Solver Builds Partnerships on PerformancePoint Server 2007 World Wide

Los Angeles, CA, October 21, 2007 --([PR.com](#))-- Over the past two months Solver has sponsored Microsoft's Office PerformancePoint Server 2007 launch in New York as a Platinum sponsor and the latest event which took place on October 12th in Johannesburg, South Africa.

Among the sponsors for the event in Johannesburg is Harvey Jones System, a leading business intelligence solutions provider which will be the first company in South Africa to be certified on Microsoft's PerformancePoint Server 2007 solution.

Solver has also developed the training material for PerformancePoint Server for Microsoft globally and will train Harvey Jones consultants and selected partners on corporate performance management solutions. Solver offers solutions for both the Enterprise and Mid-Market space that will cover full business monitoring, analytics, planning, and reporting for customer and prospect base.

"Solver has written an add-on, called Business Intelligence Studio, which complements PerformancePoint's existing functionality. In addition, we will use an accelerator, ProfitBase, to ensure rapid implementation," says Keith Jones, MD of Harvey Jones Systems.

ProfitBase 2007 is a rapid configuration data warehouse tool that significantly reduces time-to-value. It simplifies the integration of PerformancePoint Server into the operational data of the business which results in faster implementation and deployment of business intelligence solutions.

"With the release of PerformancePoint Server, Solver addresses full performance management capability. Solver is continuously building great partnerships and continues to value working with companies such as Harvey Jones and ProfitBase to drive performance management" says Johan Magnusson, Managing Director for Solver EMEA

About Solver:

Solver has over ten years of experience in implementing comprehensive performance management, budgeting/planning, analytics and scorecarding solutions for corporations and public sector organizations in the United States and around the world.

Solver specializes in delivering innovative business-driven solutions to the market place that leverage Microsoft products and technology platform. For years, Solver has supported Microsoft with consultants and subject matter experts, assisting with internal implementations and providing strategic product input.
